Technologies: **Golang** | **Elastic Search** | **Docker** | **MongoDB** | **ReactJS**

Golang Developer - 07/2021 to 10/2021
Jamalex Startup, Ho Chi Minh

Crawl Data, the data crawled can be used for evaluation or prediction in different fields. Useful for building a system to run marketing and advertise products according to user requirements.

Responsibilities:

- Scrum model teamwork.
- Build functions to get data using **Golang**.
- Build API services with **Golang**.
- Analysis and design database using **MongoDB** and **PostgreSQL**.
- Write **unit-test** for functions, optimize code.

Technologies: **Golang** | **Elastic Search** | **RabbitMQ** | **Docker** | **MongoDB** | **PostgreSQL**

Highlights

1 year of experience as a Software Engineer

- Scrum model teamwork
- Work well with API technologies: RESTful, jwt, CRUD, Authentication, Authorization
- Languages programming: Golang, C++, C#
- Experience working with database system: MongoDB, PostgreSQL, SQL Server
- Familiar with Git, Docker, Windows, Linux/Ubuntu
- Experience with Front-end technologies: ReactJS, ASP.NET mvc

Skills

- Golang, C#, C++
- Javascript, HTML, CSS
- MongoDB, PostgreSQL, SQL Server
- Docker, git, Trello, Scrum
- English, Vietnamese

Personal project

- **Golang:** challenge, CRUD APIs, jwt, crawl data,... [github](#)
- **C++:** Basic employee management, student management,... [github](#)

Education

Computer Information Technology
Da Lat University
